

Instructions for Authors About Inclusion of “Forward-Looking Statement” Disclaimers

Under current US law, US-based companies may, on occasion believe that statements in some papers submitted to SPE conferences need to be accompanied by a disclaimer relating to forward-looking statements. While this applies to a small percentage of SPE papers, SPE has developed a preferred format for inclusion of these statements.

Please note that the disclaimer should not include language that would prohibit copying or distribution of the paper without company permission (since those activities are governed by SPE's copyright and permissions policy, not by the company). If the company is so concerned about the nature of the statements that such a prohibition is deemed necessary, then perhaps it should not approve the material for inclusion in a paper submitted to an SPE conference.

Strongly Preferred Location for Inclusion of Disclaimer

Add a section at the end of the paper, after the text of the paper, but prior to Acknowledgements or References that is titled **Disclaimer**. Then include the required statements (typically no more than 2-3 sentences). For example:

Disclaimer

This paper includes forward-looking statements. Actual future conditions ...

Acceptable Alternate Location

The top portion of an SPE paper has the logo, paper number, paper title, authors, copyright statement, and provenance blurb (in smaller-sized type). This is followed by a heavy line. The paper begins below this line, typically with the title Abstract.

If a company believes that the disclaimer needs to be at the beginning of the paper, rather than the end, it is acceptable to put it in small type (same size as provenance blurb) between the line and the title Abstract. For example:

Copyright 2010, Society of Petroleum Engineers

This paper was prepared for presentation at the CPS/SPE International Oil & Gas Conference and Exhibition in China held in Beijing, China, 8–10 June 2010.

This paper was selected for presentation by a CPS/SPE program committee following review of information contained in an abstract submitted by the author(s). Contents of the paper have not been reviewed by the Society of Petroleum Engineers and are subject to correction by the author(s). The material does not necessarily reflect any position of the Society of Petroleum Engineers, its officers, or members. Electronic reproduction, distribution, or storage of any part of this paper without the written consent of the Society of Petroleum Engineers is prohibited. Permission to reproduce in print is restricted to an abstract of not more than 300 words; illustrations may not be copied. The abstract must contain conspicuous acknowledgment of SPE copyright.

Disclaimer: This paper includes forward-looking statements. Actual future conditions ...

Abstract

Inclusion of Disclaimer in Conference Presentation

A brief statement of the disclaimer as part of the presentation or inclusion of a single slide with the appropriate disclaimer language without extensive discussion is considered adequate.
